

Giant Bubble Wand **INSTRUCTIONS**

Supplies

- 2 sticks
- 1m of thick cord / string
- 50cm of thick cord / string
- 2 eyelet screws
- 1 large washer

Equipment

- Gimlet or hand drill

Instructions

1. Insert an eyelet screw into the end of each stick (use the gimlet if necessary to make a pilot hole)
2. Attach one end of the 1m cord to one of the eyelet screws.
3. Thread the large washer onto the cord
4. Attach the other end of the cord to the eyelet on the second stick. Both sticks are now connected by the cord!
5. Tie the shorter piece of cord to the long cord, just underneath each eyelet screw, to form a triangle of cord, with the washer at the point.

Using the Wand

Dip the triangle of string (not the sticks!) into your bubble mix.

Lift out of the mix, holding both sticks together. Let it drip...

Raise high, pull the sticks apart, and gently wave to make bubbles!
